

TREE SCHOOL FOR LANDSCAPERS  
The Built Landscape from an Arborist's Perspective

Presented by:

JEFF OTT & NORTHEAST PHC

March 6th, 2014      Portsmouth, NH

I've spent the last 36 years as an Arborist, owning and operating Northeast Shade Tree in Portsmouth, NH. We work on the same landscape as you do, for people who enjoy and realize the value of a beautiful outdoors.

But beauty and function don't always walk hand in hand. I'm sure you sometimes wonder what a builder or sub-contractor is thinking when they do something that interferes with the function of your landscape.

As an Arborist, I have often seen parts of a landscape which have negative impacts on both large existing trees and the development of newly planted specimens. This happens because Landscapers and Arborists do not usually work together.

**And that is the purpose of this workshop:** to work more closely together to produce Landscapes that are not only beautiful, but also functional and growing for years to come.

Finally, I had the good fortune to work closely with the late Dr. Alex Shigo, tree Guru to the world, who taught me volumes about tree biology and anatomy - I hope to pass some of that knowledge on to you.
